

ALICANTO

PAPER

About Us

Thanks to our international team and many years of experience, we at Alicanto Paper offer you the best solutions in the paper industry, creating a stable relationship of trust with you over time.

Our head office is located in Lucca - Italy, a world reference center in the tissue industry, but our managers are located in the main European cities, close to you, to ensure a fast and direct service.

Our Values

Our Team

Our team is made up of professionals with many years of experience in the paper industry and who are known and respected for their coherence and knowledge that form a solid base for Alicanto Paper. We also have young professionals who enrich our company with their modern knowledge, creative ideas and who move quickly finding solutions and answers; who animate the group with their hope for the future making it the common project on which we all work together.

Time

In a fast-paced, frenetic world, we know how important it is to respond to your needs just as quickly, and we know how much peace of mind you get from knowing that someone is dedicated to keeping on move a system that works for you. We value time, and when we've done our job, our time and yours become freedom.

Our Alicanto

"The Alicanto is a mythological figure with gold and silver feathers that leads those who follow him, silently and with dedication, to wealth". People, with their ideas, constant work, organization and enthusiasm, are our first wealth, the Gold that thanks to our Alicanto we have found and that we carefully guard.

Health

Tissue paper is a smart choice for hygiene at any time of the day and a tool for safeguarding health. With its hygienic properties, it plays an important role in protecting our health through personal use, cleaning our homes, but also and above all in public places we frequent.

The production plant - centre of quality and innovation

The choice of innovative Italian machinery and the use of advanced technologies allow us to maintain a high production rate controlled at every stage, guaranteeing a quality product.

Automation and robotics: taking advantage of the integration of intelligent digital technologies in industrial processes allows us to maintain a safe working environment while respecting people, limiting human error.

We give value to the products we offer you: we want to supervise our product by controlling every phase of its transformation, from the raw material to the packaging, for a final result that respects the best quality standards.

At Alicanto Paper we believe that our work of controlling the production phases does not end when the finished product is ready for shipping. The guarantee of a successful conclusion, with the full satisfaction of our customers, can only be offered by personally taking care of the logistics

To achieve our goal we rely on our strengths:

Advanced technologies

We use innovative solutions to coordinate and monitor transport vehicles

Efficiency

We select the best routes and optimize processes of organization reducing time and costs

Flexibility

We know how to adapt to different situations to meet your needs

Reliability

We precisely manage every phase of the logistics process to guarantee you a high level of service

We offer you a wide range of tissue paper products needed in various commercial areas for industrial and household use.

Our products are created paying attention to always respecting the highest criteria of quality and certified sustainability and are suitable for all your needs because they respond to your specific customization requests

Cellulose

We supply carefully selected and certified virgin cellulose

Mother paper reels

We propose you pure or recycled tissue paper reels, in different formats and grammages

Toilet paper

We offer you toilet paper produced with pure or recycled tissue paper

Towels

You can choose between our types of pure or recycled tissue paper towels, in roll or folded versions

Fold napkins

In pure cellulose tissue paper especially produced for specific use on the face
